Growing the Database

This is our most up to date list gleaned from correspondence with the Consultants over the last 6 months. We really want to build this up so as to become a living, breathing up to date resource for you all to be able to access. We would love it to include Orthotists, Cordwainers. Physiotherapists and Occupational Therapists etc. It would be really helpful, if every time you encounter a medical professional whom you think is worth recommending that you take their details and pass them on to SPPN. We will check if they are willing to go on our database and hopefully build up a useful resource for everyone. Please use the contact form on the website. Thank you.
